

Use your meeting spaces more efficiently with our compact interactive meeting room signs

Manageable

Remotely manage all aspects of device configuration via your web browser. Optionally manage all devices centrally from the ONELAN CMS alongside a full digital signage network.

Customisable

Reserva Edge allows you to add your own logo to the display, add your own background, and choose the colors your room signs uses to indicate free or busy.

Digital Signage

Use your room signs as a communications platform with multizone layout design and extensive playlist and scheduling controls.

Performance

Leveraging the Intel Atom platform the Reserva Edge offers significant improvements in performance and responsiveness.

Monitoring

When connected to the ONELAN CMS room signs can be remotely monitored including remote screenshot, support snapshot and notifications if room signs are offline.

Reserva Edge is an intuitive meeting room signage solution which can be used in corporate, education and hospitality industries. Reserva supports integration with market leading calendar and timetabling systems.

Best-In-Class Industrial Design

Ergonomic tilted touchscreen interface, edge to edge glass, anti-fingerprint coating, fully concealed cables and connectors, clear LED status illumination inside and outside the room and fully integrated NFC reader (optional).

Reserva Range

The Reserva room signs are a unique range of displays providing room booking technology, with an intuitive and customisable interface. Significantly, they also offer digital signage functionality meaning the room sign can be used as a dynamic communications platform on which businesses, educational institutions and hospitality venues can advertise, build brand awareness and share their internal communications.

Reserva Edge

Reserva Edge is a purpose built room sign with an Intel processor and features a unique ergonomic tilted touch screen interface. It has also been designed to fully conceal wires and has a fully integrated mounting kit for both glass and walls. In addition, the large LED status bar enhances visibility and can be customised to reflect brand colours. The built-in NFC card reader allows users to check-in to meetings to minimise the workspace wastage from no-shows.

Reserva 15.6 & 21.5 Inch (2nd Gen)

The 15.6 and 21.5 inch Reserva displays use the same powerful internal hardware as the Reserva Edge, however each provide larger displays which can be mounted in either portrait or landscape. These displays have been specifically designed for applications where visibility from a greater distance is required, such as hospitality. The larger displays also provide a greater opportunity to utilise Reserva's unique 4-zone digital signage capabilities.

Reserva Room Summary

In addition to meeting room signs, the Reserva Room Summary solution shows upcoming meetings in a range of meeting rooms. This content is ideal for installation in a reception area or beside elevators in larger buildings and helps staff, students or guests find where they are meeting. This content may be displayed in either a multizone layout or full screen, and in portrait or landscape orientation.

Reserva Analytics

Reserva Analytics is a browser-based solution providing room booking data in a clear, easy to use dashboard. Reserva Analytics allows organisations to monitor and optimise resources through displaying individual user behaviour data and room utilisation data as well report on the technology resources within the meeting spaces. These analytics enable organisations to base their long-term strategic decisions on proven quantitative data.
